# Netflix Stock Prediction

```
import numpy as np # Linear algebra
import pandas as pd # data processing, CSV file I/O (e.g. pd.read_csv)
# Now some of Visualisation libraries
import matplotlib.pyplot as plt
import seaborn as sns
```

## Data & EDA

```
In [2]:
df= pd.DataFrame(pd.read_csv("../input/netflix-stock-price-prediction/NFLX.csv"))
df.head()
```

Out[2]:

|   | Date       | Open       | High       | Low        | Close      | Adj Close  | Volume   |
|---|------------|------------|------------|------------|------------|------------|----------|
| 0 | 2018-02-05 | 262.000000 | 267.899994 | 250.029999 | 254.259995 | 254.259995 | 11896100 |
